CSE 316: Microprocessors and Microcontrollers Lab Team Contribution

Submitted by:

MD Faizullah Toushif(23101037)

Hamdil Hasan Partho(23101040)

Sumaya Akter Lima(23101041)

Shayla Hossen Simu(23101042)

Section : A2

Semester : 3rd year 2nd semester

Submitted to:

Khadiza Sultana Sayma

Lecturer, Department of Computer Science and Engineering

Team Member	Role	Contribution
Faizullah Toushif	Firmware Development & IoT Integration	- Developed ESP32 firmware integrating sensors, pump, and servo control. - Set up and configured the IoT platform (Blynk) for real-time monitoring and control. - Contributed to writing the technical methodology and firmware configuration sections of the report.
Shayla Hossen Simu	Hardware Implementation & Circuitry	- Implemented and adjusted DHT11, HC-SR04, capacitive soil sensor, and rain sensor. - Set up relay and servo circuits for pump and shed control, also helped in coding - Assisted in assembling the physical system prototype and compiling the project budget report.
Sumaya Akter Lima	System Architecture & Visualization	- Prepared system architecture diagrams, system flowcharts, and data tables. - Designed clear, IEEE-compliant figures for sensor integration and the system prototype. - Contributed to writing the abstract, introduction, and compiling the project Gantt chart.

Hamdil Hassan Partho	Testing, Evaluation & Technical Editing	- Conducted full system testing and evaluation of sensor readings, pump, and shed operation. - Compiled the results, discussion, and system evaluation protocol. - Reviewed and edited the entire report for clarity, coherence, and IEEE formatting compliance. - Integrated all documentation materials, CEP mapping, and final annexures.
